### DETAILED ACTION

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- a) method of producing a green article, and
- b) method of densifying a green article.

Upon the election of the above species applicant is also required to elect the method step of forming green compact article by:

- i) containerization,
- ii) free-forming layer wise buildup technique
- iii) injection molding, and
- iv) die pressing.

Should applicant elect method of densifying a green article applicant is further required to elect the heating temperature at which the article is being sintered:

b1) lower than the solidus temperature of each of the relatively coarse prealloyed metal powder or

b2) exceeds the solidus temperature of each of the relatively coarse prealloyed metal powder

2. Applicant is required under 35 U.S.C. 121 to elect a single ultimate disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ngoctan T. Mai whose telephone number is (571) 272-1246. The examiner can normally be reached on 9:30-6:00 PM Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy King can be reached on (571) 272-1244. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
